## CERTIFICATION

Skill development | Advanced Diploma in Python Programming | Prompt Engineering for AI Applications

## EDUCATION

2022-2025 Rajkot, GJ	Diploma in Computer Engineering ~Atmiya University
2020-2021 Amreli, GJ	10 <sup>th</sup> Schooling ~Krishna Public school

## SKILLS

**Technical:** Word, PowerPoint, HTML/CSS, C/C++, Python, Photoshop.  
**Soft:** Problem Solving, Communication, Time Management, Creativity, Adaptability, Teamwork.

## PROJECTS

### Digital Overlay Project for Live Sports Advertising

This Python project focuses on creating a digital overlay technology to dynamically insert video advertisements into specific areas of a live video feed, such as during a sports match. The system identifies a designated region (e.g., a boundary line, a banner) within the video and replaces it with a targeted video ad. This enables the display of different advertisements to viewers in different regions or with different demographics, increasing advertising revenue and audience engagement.

### Complaint registering chatbot

A responsive This Python-based chatbot automates the process of registering Wi-Fi service complaints. It interacts with users to gather essential information, including their name, phone number, and email, and details about their issue. The chatbot assigns a unique complaint number to each report and saves the information to a text file for record-keeping.
